

**PROCESS INTRODUCTION:** Mineral Supplement WET FINISH is a non-film-forming solution for the consolidation and waterproofing of all porous mineral materials.

With a very strong power of surface mineralisation, it enables to ensure an enhanced protection against greases and stains. It provides an effective protection against graffiti, and is not sensitive to UV, the mineralisation is definitive.

Mineral Supplement WET FINISH is a solution of silicon poly-crystals. It penetrates by capillary action in materials, where it causes by chemical reactions the crystallization of the free lime and the formation of silica in the pores.

This reaction is called mineralization. After treatment the substrate becomes waterproof and more resistant to external attacks (de-icing salts, cleaning products, high-pressure cleaning, gel, atmospheric aggression, etc.).

Mineral Supplement WET FINISH has a fast-drying time (from 30 min to 2 hours depending on the conditions) and does not alter the material aspect. The treated materials significantly improve their physical properties. It is recommended to apply at first MINERALIZER AS to mineralize the material in depth.

### SCOPE OF IMPLEMENTATION:

Mineral Supplement WET FINISH can be used in preventive or curative treatment on all porous mineral materials such as: stone, terracotta, slates, concrete, reconstituted paving, granite, tile joints, porous tiles, etc., in outdoors, on dry materials.

**LIMITATIONS OF USE:** Mineral Supplement WET FINISH is a mass treatment product which penetrates the materials by capillary action, the treated surfaces must be clean and sound: they must not contain synthetic coating of organic origin (painting, resins, waterproof silicone-based and various film forming coatings).

**It is essential to proceed with a preliminary test before any definitive treatment**

### PACKAGING:

5 L, 2 L plastic containers and 500 ml spray.

\* Dangerous – Observe the precautions for use.

The information contained in this leaflet is intended to help users. It is from the result of tests carried out objectively in our laboratories. It is up to the users of our products to consult the latest version of this document on our website and to decide if the products are suitable for the job they want to do. ## IMPLEMENTATION SHEET

### MINERALIZER WET FINISH

Mineral Supplement

#### APPLICATION:

Pulvérisateur

Bâche de protection

Adhésif

On a clean material, apply uniformly with a sprayer, 1 layer of Mineralizer AS, then on the surface to be treated a layer of Mineral Supplement WET FINISH after a minimum of 2 hours. On closed substrates it is possible to directly apply Mineral Supplement WET FINISH. After applications, leave it to penetrate for 15 minutes and wipe the excess with absorbent paper.

**AVERAGE CONSUMPTION:** 1 Litre = 8 m<sup>2</sup> to 10 m<sup>2</sup> depending on the porosity.

#### CONDITIONS AND PRECAUTIONS OF APPLICATION:

Temperature of the	5°C	20°C	Ambient temperature	5°C	25°C
--------------------	-----	------	---------------------	-----	------

**It is essential to proceed with a preliminary test before any definitive treatment**

Mineral Supplement WET FINISH is ready to use. Do not mix it with another product, do not dilute. The 'wet effect' of the product will decrease by 30 to 50% on drying.

**It is essential to protect all the materials**

**which are not to undergo this treatment:**

Gouttières

Ouvertures

Vérandas

glass surfaces, door frames and conservatories in aluminium or PVC, paint, panelling, vehicles, etc. Do not apply in direct sunlight. Do not apply in frosty weather or when there is a risk of frosting in the hours which follow the application. Do not use the sprayer in high winds.

**Shake the container well before use.**

**CLEANING OF THE EQUIPMENT:** Clean the equipment with rubbing alcohol or bio-solvents, do not allow the product to settle in the sprayer. Recycle or dispose of the packaging in accordance with the legislation in force.

#### PHYSICAL AND CHEMICAL PROPERTIES:

**STATUS:** liquid

**COLOUR:** colourless to light yellow.

**ODOUR:** Aromatic

#### DANGER AND SAFETY INFORMATION:

**H335:** May cause respiratory irritation. **P101:** When consulting a doctor, take a product container or label with you. **P102:** Keep out of the reach and sight and children. **P103:** Read the label before use. **P210:** Keep away from heat/sparks/open flames/hot surfaces – No smoking. **P261:** Avoid breathing vapours. **P264:** Wash your hands thoroughly after handling. **P280:** Wear protective gloves/protective clothing/eye protection/face protection. **P303 + P361 + P353:** IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing.

Rinse skin with water/shower. **P304 + P340:** IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. **P305 + P351 + P338:** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. **P312:** Call an ANTI POISON CENTRE or a doctor in case you feel unwell. **P337+P313:** If eye irritation persists: Get medical advice/attention. **P403+P235:** Store in a well-ventilated place. Keep in a cool dry place. **P501:** Dispose of contents/containers at an approved disposal centre in accordance with local regulations.

Dangerous – Observe the precautions for use.

#### PERSONAL PROTECTIONS:

Lunettes

Protection respiratoire

Gants

Bottes

Combinaison de travail
